

Facilitator: Magnus Andersson

Participants: Ali Alladin, Magnus Andersson, William Hugo, Elias Johansson

Date: 2020-09-16

Meeting

§1 Objectives

Separate design model and domain model

§2 Reports

- **Elias** fixed a bug in the search function that made it always display an empty list. It now works as intended.
- **Ali** made some new activities for login and register. Added some functionality to register by connecting it to firebase authentication.
- **Magnus** got images to work through the database both in the cards and on the listing page.
- **William** worked on trying to make the searchbar work, Ali found the bug that made the functions not being called.

§3 Discussion Items

1. Is it necessary to store images in the database at this stage of development since it takes up a lot of space in the database?
2. Build junit testing for all relevant functions?
3. Why are our Travis builds failing?

§4 Outcomes and assignments

§4.1 Outcomes

- The group decided that it should wait and see how much space the images take up in the database. The functionality will be removed for now if they grow to be too large.
- Our Travis builds are now working courtesy to Magnus.

§4.2 Assignments

Write JUnit-tests for our public methods and add dependencies to Jdepend and PMD for Gradle.

Facilitator: Magnus Andersson

Participants: Ali Alladin, Magnus Andersson, William Hugo, Elias Johansson

Date: 2020-09-16

- **Elias** will figure out a way to do that effectively for some classes using logs.
- **Ali** will continue working with user and login.

§5 End of Meeting

Next meeting will be 2020-09-21 15.00.
