

Facilitator: Elias Johansson

Participants: Ali Alladin, Magnus Andersson, William Hugo, Elias Johansson

Date: 2020-09-11

Meeting

§1 Objectives

- We need to revisit the UML document now that we are closing in on a working MVP.

§2 Reports

The group worked together to create the first draft of user stories, RAD document and a domain model. None of which have been discussed with the supervisor yet.

Each group member then took one task each for the MVP intended for the seminar.

- **Elias** worked on the RecyclerView and created an adapter so the different listings show up in it as cards. A specific item can then also be clicked to showcase more detailed information in the object via a new activity.
- **Magnus** Integrated the listings with the listings on the database. For both searchpage and listingPageActivity. There are still hard coded parts left however.
- **Ali** created the main parts of the GUI for the application in Android Studio, eg. the search-page, listing-cards, listing detail page and profile-page.
- **William** worked on a search function that filters a list of cards while typing into the search bar intended to update everything in real time as the user writes. Currently the search function doesn't work, will work more on it.

§3 Discussion Items

1. UML document
2. Should we prepare questions for the upcoming meeting with our supervisor?

§4 Outcomes and assignments

§4.1 Outcomes

1. We reviewed the UML document
2. We discussed among the group questions for supervisor
3. There is an unresolved issue with the search bar.

§4.2 Assignments

-

Facilitator: Elias Johansson

Participants: Ali Alladin, Magnus Andersson, William Hugo, Elias Johansson

Date: 2020-09-11

§5 End of Meeting

Next meeting will be 2020-09-14 10.00.
