

Facilitator: William Hugo

Participants: Ali Alladin, Magnus Andersson, William Hugo, Elias Johansson

Date: 2020-09-21

Meeting

§1 Objectives

- We still have the double search bars
- Talk about the feedback from last mentor meeting

§2 Reports

- **Elias** has fixed some bugs, made the logout button work. Also looked into how to integrate the phone's camera roll in the application.
- **Magnus** looked into plugins. Jdepend not in this version of Gradle. PMD exists but failed to get it to work for now. Syncs fine but does not appear in gradle check or gradle tasks. FindBugs, intellij version works, seems to be separate from gradle, more of an android studio analyze thing.
- **William** made the SearchFuntion a separate class from ListingAdapter & MainActivity, made it functional. There's still some issues with it that need polishing.

§3 Discussion Items

- New assignments
- Once we start to finish user stories it might be time to refactor.
- Do the things Pelle discussed in last mentor meeting with generalize variable declarations and stuff
- Fixing the double searchbars

§4 Outcomes and assignments

§4.1 Outcomes

-

Facilitator: William Hugo

Participants: Ali Alladin, Magnus Andersson, William Hugo, Elias Johansson

Date: 2020-09-21

§4.2 Assignments

- **Elias** will look into a way to access the device's camera roll and camera.
- **Ali** will continue working on the user. He will also try to create a new activity to add listings and design it. Improve the design of login and register activities.
- **Magnus** will try to add a database function to upload new listings, and do some refactoring.
- **William** will add a SortFunction that can filter by any variable Listings can have (ex. cheapest to expensive, etc.)

§5 End of Meeting

Next meeting will be 2020-09-24 13:15.
