

Facilitator: Ali Alladin

Participants: Ali Alladin, Magnus Andersson, William Hugo, Elias Johansson

Date: 2020-10-09

Meeting

§1 Objectives

- Final fixes on peer-review and submission.
- Discussion about the messaging.

§2 Reports

Outcome of assignments:

- **Elias** wrote some tests, two of them need more work since they are commented out. Created a temporary xml file that functions as a card that will show messages. Made it possible to show said card in a recyclerview under the “Messages” section by modifying MessageAdapter and MessagesPage.
- **Ali** changed the how information about the listing is retrieved in ListingPageActivity. Instead of sending that information from the previous activity it is now directly retrieved from the database. By doing this change the ListingPageActivity is updated as soon as the listing is edited. Also created an activity for filter and sort and started designing it. It's not sure whether it will be used or not.
- **Magnus** fixed the sort function, and added date sorting functionality. A bug has been found on some machines for the test written for date sorting, but travis and android studio have found no problem.
- **William** made so books can be searched by ISBN now. Created four classes for cryptography: one generating new keys, two classes being keys (public and private), and one class for encryption/decrypting. Also made some tests but need more.

§3 Discussion Items

1. Peer-review
 - Pelle had some different thoughts about what to include in the peer-review compared to the assignment page, we thought they were reasonable, and will include them.
 - Expand on our thoughts about the user stories.
 - Discuss the dependency issues.
2. Should “MessagesPage” contain a list of messages or users?

Facilitator: Ali Alladin

Participants: Ali Alladin, Magnus Andersson, William Hugo, Elias Johansson

Date: 2020-10-09

§4 Outcomes and assignments

§4.1 Outcomes

1. Handed in peer review.
The group didn't find a solution to their dependency issues.
2. MessagesPage should contain a list of Users. This will be fixed later.

§4.2 Outcomes

- **Elias** will look for a way to display a list of messages per user maybe try to implement it. Continue with tests.
- **Ali** will create a settings-activity so that the users can change their personal-data. Try changing the way book's are saved in the database.
- **William** will start working on a messaging system
- **Magnus** will try to show how the listings are sorted and reverse sorting on second click

§5 End of Meeting

Next meeting will be 2020-10-12 15:15.
