Meeting

§1 Objectives

- Preparing the RAD and SDD
- Find ways to prepare our code for the review.

§2 Reports

- **Elias** refactored AddListing to three classes, wrote some javaDoc comments and wrote tests.
- **Ali** finished the work with favourites so that they now can be saved and accessed from the account-page, added functionality to the delete button so that the user can delete listings, wrote JavaDoc comments for the ListingPageActivity class, moved the search functionality from MainActivity to SearchPage and refactored the code so that the searchresult-list is created in SearchPage instead of MainActivity.
- **Magnus** split listings, they are now a superclass item, and subclasses book and notebook. Also rewrote the overlapping listeners, and that solved the bug discussed in the previous meeting.
- **William** made functional buttons for sorting and wrote JavaDoc comments.

§3 Discussion Items

1. How should the SDD look?
2. How up-to-date is the RAD?
3. What is our definition of done?

§4 Outcomes and assignments

§4.1 Outcomes

1. There is a template on Canvas that can be followed
2. The SDD and RAD are almost up to date.
- 3.

§4.2 Assignments

Everyone in the group should try to work on the SDD, RAD and Models in LucidChart.

- **Elias** will look for a way to handle messaging and comment some more code.
