Facilitator: Elias Johansson
Participants: Ali Alladin, Magnus Andersson, William Hugo, Elias Johansson
Date: 2020-09-24

Meeting

§1   Objectives

Discuss how to connect the different components that were implemented.

§2   Reports

- **Elias** added functionality so the user can take a photo from the app and store it.

- **Magnus** refactored some code. Also connected the add listing activity with the database.

- **William** fixed a SortFunction class that has different methods for sorting in different ways, currently it can sort listings by names in alphabetical order, or by price. The buttons for calling these methods are yet to be made.

- **Ali** changed Register so that the users are also added to the database when they sign up. Also re-designed the login and register page and created the add_listing activity.

§3   Discussion Items

1. How should our list of listings be sorted by default?
2. Discussion about where the sort/filter button should be in our UI.
3. How should we handle sending images through intents since they have to be heavily compressed for it to work?

§4   Outcomes and assignments

§4.1 Outcomes

1. Our list of listings should be arranged in newest to last by default.
2. Where the sort/filter buttons should be arranged is left undecided.
3. The images can be left compressed for now.

Facilitator: Elias Johansson
Participants: Ali Alladin, Magnus Andersson, William Hugo, Elias Johansson
Date: 2020-09-24

§4.1 Assignments

- **Elias** will write tests, refactor code, i.e search function, AddListing, take a look at instance variables and methods' access modifiers.

- **Ali** will work with the lists on the Account-page.

- **Magnus** will fix the last details with AddListing. Write tests. Take a look at User.

- **William** will make buttons that are connected to SortFunction so that the user can sort the list, and make tests for the different methods in SortFunction.

§5 End of Meeting

Next meeting will be 2020-09-28 15:15.
