Facilitator: William Hugo
Participants: Ali Alladin, Magnus Andersson, William Hugo, Elias Johansson
Date: 2020-09-07

Meeting

§1 Objectives

- Discuss group members GUI mock-ups
- We need to discuss our lack of Acceptance criteria for user stories
- We need to discuss the RAD document
- We need to discuss the Domain model UML

§2 Reports

Each group member did a GUI mock-up in figma, everyone made their own to try to make a mock-up that's "unbiased" by each other's ideas. This was done to see if we'd get a wider range of ideas to discuss before we all get on the same track for designing.

- **Elias** did a mockup of a list of books in card form and another page that shows the detailed view the user would get when tapping on one of the books. The detailed view contains information about the book, the seller and the sellers reviews.

- **Magnus** did a GUI mock-up of the front page and a "find books" page.

- **Ali** designed a GUI mock-up mainly based on components from the material design ui-kit. The mock-up contains a couple of page with the main being the search-page where the user is supposed to search for books. The search result is displayed in a list of cards. The cards open up the listing page where more details can be found. Finally a profile page was designed.

- **William** designed a start page and menu, main focus was on a infinity scroll list filled with cards showing a picture of the book, title, author, etc. Intended to have this used on buy, sell, and save sections of the app since all of those contain lists of items.

§3 Discussion Items

1. Which GUI mock-up should we go with?
2. Adding acceptance criteria for user stories.
3. RAD document.
4. Domain model UML - [Lucidchart](#).

Facilitator: William Hugo

§4   Outcomes and assignments

§4.1 Outcomes

1. Ali's GUI is chosen as the preliminary GUI. Everyone liked the style but we reserve the right to modify it as we go along.
2. Acceptance criteria have been added to user stories in a group activity.
3. We have started working on the RAD document.
4. Lucidchart will be used to model the UML diagram.

§4.2 Assignments

Look for ways to transfer figma design to runnable code.

§5   End of Meeting

Next meeting will be 2020-09-11 14.00
