**Facilitator:** William Hugo
**Participants:** Ali Alladin, Magnus Andersson, William Hugo, Elias Johansson
**Date:** 2020-10-22

# Meeting

## §1 Objectives

- This meeting will serve more as a checklist of final code changes
- Refactor design patterns
- Check RAD and SDD

## §2 Reports

- **Elias** Worked on getting existing functionality working with cryptography. Refactored some code, added an interface and factory for message. Wrote some javadoc. Worked on RAD and SSD.

- **Ali** made some final changes to the user interface and formatted all the mentor meeting minutes. Have then mostly worked with the other documents (RAD and SSD).

- **William** Worked on getting cryptography to work with messages. Users now have their own private and public set of keys which are generated for them when the account is first created. Wrote some javadoc.

- **Magnus** Fixed multiple bugs. Encryption bug, with byte array to string. Message bug where all messages became the latest. Erroneous loss of both database user name, and bookID.
  Also refactored sortFunction into sort strategy

## §3 Discussion Items

1. Finalize JavaDoc and check that all class names follow similar naming conventions
2. Change the name com.example.amwe
3. Change our design diagram to reflect the domain diagram, as stated in SDD system design instructions

## §4 Outcomes and assignments

### §4.1 Outcomes

Discussion items have been remedied.

**Facilitator:** William Hugo
**Participants:** Ali Alladin, Magnus Andersson, William Hugo, Elias Johansson
**Date:** 2020-10-22

## §4.2  Assignments

Everyone checks the author tags one last time. Same with JavaDoc. Today is the last day to add new code. Tomorrow is the finalization of documents.

Self evaluation.

# §5    End of Meeting

This was the last meeting.
